

# DANUSHKA MADUSHAN

*Associate Software Engineer*

## PROFESSIONAL SUMMARY

---

Associate Software Engineer with 2+ years of enterprise experience delivering full-stack systems across .NET Core, Angular, and SQL Server. Proposed and led the decomposition of a legacy monolithic application into independent services, built production supplier-facing portals, and improved data access performance by ~20%. Looking to grow into a mid-level backend or full-stack role in a product-focused engineering team.

## WORK EXPERIENCE

---

### ASSOCIATE SOFTWARE ENGINEER

May 2025 — Present

#### *Courtaulds Trade Company*

- Engineered 3 full-stack modules across supplier-facing systems and internal business applications using .NET Core, Angular, SQL Server, and Entity Framework Core
- Delivered a ~20% performance improvement on critical data access workflows by optimizing SQL stored procedures and refactoring Entity Framework Core query patterns
- Reduced supplier communication overhead by building real-time notification and update features using SignalR/WebSockets, cutting repetitive back-and-forth messaging between teams and suppliers
- Designed and implemented secure RESTful APIs with JWT authentication and role-based authorization across multiple enterprise applications
- Identified architectural inefficiencies in a legacy monolithic application and proposed the separation into independent services — leading the decomposition of the supplier portal and internal modules into a cleaner microservices-based structure
- Integrated SAP services and third-party APIs into internal workflows, enabling automated data exchange and reducing manual entry points across business processes
- Collaborated cross-functionally with QA engineers, business users, and SAP teams in Agile cycles, contributing to code reviews, requirement analysis, and release planning

### INTERN FULL STACK DEVELOPER

May 2024 — May 2025

#### *Codeolima (PVT) LTD*

- Contributed to the backend of the ChamberSkills business portal — a live platform used by businesses to manage course listings, gallery content, and handle user course inquiries — built with Node.js, Express, and MongoDB
- Personally built or contributed to build RESTful APIs powering frontend-backend communication across the admin panel and public-facing inquiry workflows
- Assisted senior developers on the admin dashboard, enabling the ChamberSkills team to self-manage course content, images, and listings without developer intervention
- Supported deployment and environment management using AWS services and Docker, contributing to the successful go-live of the platform
- Developed cross-platform mobile application features using Flutter and Expo as part of broader product delivery
- Participated in CI/CD pipelines, Git-based workflows, and Agile/Scrum cycles across a full product development lifecycle

## EDUCATION

---

### BENG (HONS) SOFTWARE ENGINEERING (TOP-UP)

May 2025 - May 2026

#### *London Metropolitan University*

### HIGHER NATIONAL DIPLOMA IN SOFTWARE ENGINEERING (LEVEL 5 PEARSON BTEC)

May 2023 - May 2025

#### *ESOFT Metro Campus*

---

## SKILLS SUMMARY

---

- Programming Languages: C#, JavaScript, TypeScript, SQL, Python
- Backend: .NET Core (.NET), Node.js, Express.js
- Frontend: Angular, React, Angular Material, Tailwind CSS, Bootstrap
- Mobile Development: Flutter, Expo
- Database & Data Access: SQL Server, MongoDB, Entity Framework Core, Dapper, ADO.NET, Stored Procedures, LINQ
- DevOps & Cloud: Docker, Docker Compose, CI/CD (GitHub Actions), AWS
- Tools & Others: Git, GitHub, Postman, Swagger, Linux, Figma

---

## PROJECTS

---

### SUPPLIER PORTAL(COURTAULDS TRADE COMPANY — PROFESSIONAL)

*.NET Core · Angular · SQL Server · Entity Framework Core · SAP Integration · SignalR*

- Built a supplier-facing enterprise portal enabling real-time communication between internal teams and suppliers, replacing manual email-based workflows
- Integrated SAP services and third-party APIs to automate data exchange, reducing manual entry points across business processes
- Implemented SignalR-based live notifications, cutting repetitive back-and-forth supplier messaging

### SSO AUTHENTICATION PLATFORM (COURTAULDS TRADE COMPANY — PROFESSIONAL)

*.NET Core · Angular · JWT · Role-Based Authorization*

- Designed and built a centralized Single Sign-On platform serving multiple internal applications with JWT-based authentication and role-based access control
- Contributed to the broader monolith-to-microservices migration by decoupling authentication from legacy systems into a standalone service

### ISSUE REPORTING SYSTEM (FINAL YEAR PROJECT — LONDON METROPOLITAN UNIVERSITY)

*Expo (React Native) · .NET Core · React · SQL Server*

- Built a cross-platform issue reporting system with a mobile app (Expo), web dashboard (React), and .NET backend — designed for end-to-end issue submission, tracking, and resolution workflows

### EASY APPY (PERSONAL PROJECT)

*NextJS · Gmail*

- Built a personal job application automation tool that connects to Gmail, attaches a CV, and sends templated application emails with just an email address and position name — solving a real repetitive task in my own job search
